February 22, 2001

TO OUR CURRENT AND PROSPECTIVE PARENTS:

GYFT Clinic is instituting a request to all parents with young children. Please consider the following reasons for our request:

- If you are a new patient or plan a lengthy visit with the physician or nurse, we request you leave your children at home. We realize this may be inconvenient, however, we feel that it is in your (the patient's) best interest. The examinations, discussions and conferences are very important and require your undivided attention.
- We want you to be able to maximize your time with the nurses and physicians and to have the opportunity to have all your questions answered. From experience this can only be accomplished by having you focus on the topic of conversation and the individuals presenting it.
- It is our responsibility to minimize the exposure to childhood disease and illnesses for our OB patients. Recent research demonstrates an increase in childhood disease such as Rubella, due to children not being immunized. It is our sincerest wish to positively affect the outcome of all our patients. We understand that visits to GYFT Clinic are temporary and of short duration, however we have a responsibility to all our patients to reduce the chances of exposure during critical times such as these. We realize this is a small step, but we must start somewhere.
- We ask that you consider our Fertility patients. Visits to our Fertility Clinic can be stressful and emotional and sitting in a waiting room filled with children can cause uneasiness. Please help us to help them feel comfortable in our facility.

We ask your cooperation in helping us provide you with the best and most efficient care. We have an excellent knowledgeable staff and it is to your benefit to be able to maximize your time with them.

Thank you,

Drs. Mc Lees, Robinette & GYFT Clinic Staff
